HOW TO IMPROVE YOUR PRACTICE'S BOTTOM LINE

Replace your current inefficient water system with the fully automatic **Dental Pure Water System**, which produces 99.999999% Pure Water for the entire practice and eliminates headaches of repairs and chemical treatments.

DCI - *Ergonomic Chairs* -

The Dental Pure Water System is protected with anti-backflow valves to prevent cross contamination in each dental chair & lab. The Patented Purifier /Distiller Quality is tested by "Bacterial Spore Tests" in Log5 and Log6 to insure pure water production & purity of 99.999999% & 000 - 002 TDS.

Certified to ANSI/NSF 62 Standard
-- FDA Cleared --

The quick fix of water line filters and self-contained water bottles require precious time for replacement and chemical cleaning, only to have the water re-contaminated by the untreated compressed air flowing through them.

DENTAL PURE AIR SYSTEM:

FDA Cleared

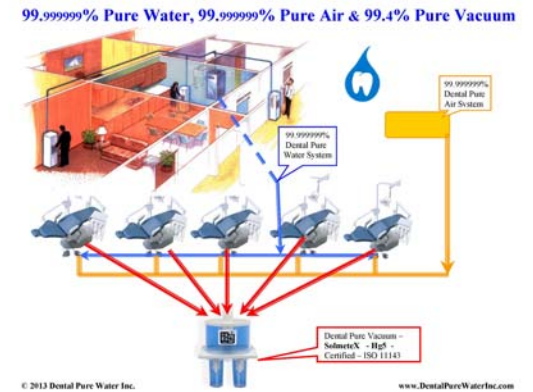

The Dental Pure Air System purifies compressed air from the air compressor by removing oil, dust and water. The air then is disinfected / sterilized to 99.9% purity by a specially designed Ultra-Violet System and protected from cross contamination with a new style Anti-backflow Valve. This system produces Pure, Dry & Clean compressed air and eliminates many associated problems. This new design also features a new Solenoid which saves on repairs and electricity by unnecessary cycling. Exceeds ANSI/ADA Spec's No. 94
